## NOTICES

**FINAL DISPOSITION:** This Research Product may be destroyed when it is no longer needed. Please do not return it to the U.S. Army Research Institute for the Behavioral and Social Sciences.

**NOTE:** This Research Product is not to be construed as an official Department of the Army document in its present form.

DD FORM 1473 EDITION OF 1 NOV 65 IS OBSOLETE

ARI Research Product 87-13

20. (Continued)

a set of two-way tables of NRS items crossed with five banner variables; and in a technical appendix the survey instrument used in the summer of 1986.

Separate tabulation volumes were produced for each of the three Army components: the regular active Army (RA); the U.S. Army Reserve (USAR); and the Army National Guard (ARNG). Tabulations reflect data gathered during the summer administration of the survey. The crossing variables used in each tabulation volume include demographic and service-related characteristics that vary across components.

Other reports in this series provide more extensive documentation of the background and approach to the 1986 NRS administration. Other reports are also available for the 1982, 1983, 1984 (summer and winter), and 1985 survey administrations.

ARI Research Reports and Technical Reports are intended for sponsors of R&D tasks and for other research and military agencies. Any findings ready for implementation at the time of publication are presented in the last part of the Brief. Upon completion of a major phase of the task, formal recommendations for official action normally are conveyed to appropriate military agencies by briefing or Disposition Form.

---

This survey research was sponsored by the Directorate of Program Analysis and Evaluation, U.S. Army Recruiting Command, Office of the Deputy Chief of Staff for Personnel. The U.S. Army Recruiting Command provided funding for the survey instrumentation, field administration, database development, documentation, and tabular descriptions produced under the following task and delivery orders of the U.S. Army Research Office Scientific Services Program Contract No. DAAG29-81-D-0100:

Task Control No. 86-360, Delivery Order No. 2345;  
Task Control No. 86-361, Delivery Order No. 2317;  
Task Control No. 86-541, Delivery Order No. 2514.

The U.S. Army Research Institute provided personnel and funding for research planning, design, and analysis, as well as personnel for technical monitoring of the contracts, survey design, field administration and coordination, database development, and documentation. Edward L. Levine has been a sub-contractor for this effort, providing field administrator personnel and training. Data Recognition Corporation has also been a sub-contractor for this research, providing survey forms development, optical mark reading support, database construction, tabular analyses and supporting documentation.

**ARI Project Staff:**

Michael Benedict, Timothy Elig.

**E. L. Levine Project Staff:**

Cathlene Barry, William Brown, Brett Cohen, Debbie Goldsmith,  
Edward Levine, Peggy McPherson.

**DRC Project Staff:**

Luaina Hagen, Russell Hagen, David Kopischke, John LaBatte,  
Deborah Renneke.

## FOREWORD

---

The Army Research Institute (ARI) Enlistment Decision Surveys have become an important source of information to U.S. Army policy makers and planners. Originally developed by ARI in 1982 under a commission by the Deputy Chief of Staff for Personnel, the surveys were intended to provide answers to questions concerning the enlistment motivations and demographic characteristics of incoming U.S. Army recruits. Complimenting these original information sources are the surveys' ability to track changes in new recruit characteristics over time, as well as to provide an opportunity for the collection of new, policy-relevant information during each survey administration.

The ARI New Recruit Surveys (NRS) of 1982 and 1983 were conducted at the request of the U.S. Army Deputy Chief of Staff for Personnel. Sponsorship of the 1984, 1985, and 1986 surveys was assumed by the U.S. Army Recruiting Command (USAREC), with the continuing interest of the Office of the Deputy Chief of Staff for Personnel (Memorandum of Agreement Between the U.S. Army Recruiting Command and the U.S. Army Research Institute, signed 16 May 1985 and 22 April 1985, Subject: Sponsorship of ARI Enlistment Decision Surveys; and letter, U.S. Army Recruiting Command, USARCPAE-RS, 7 April 1986, Subject: Direct Fund Authorization For 1986 New Recruit Survey).

Initial results of the 1986 survey have been provided in the form of briefings to the Commander of the U.S. Army Recruiting Command (on 6 Aug and 4 Dec 1986), the Director of Military Personnel Management (ODCSPER) (on 5 Dec 1986), and the Deputy Chief of Staff for Personnel (on 12 Dec 1986).

Specific policy and operational decisions have been made based on these results. For example, USAREC's dual-market recruiting and advertising operational plan was developed and continues to be monitored using analyses of NRS data. In addition, the survey effort has been transferred from a developmental effort at ARI to an operational tool of the Recruiting Command for monitoring recruiting policy and program implementation.

EDGAR M. JOHNSON  
Technical Director

## ACKNOWLEDGMENTS

---

The U.S. Army Research Institute wishes to acknowledge the assistance and support of the many individuals who assumed important roles in site preparation, survey instrumentation, field administration, data preparation, data quality assurance, database construction, tabular analyses, and documentation of the 1986 ARI New Recruit Survey. We especially appreciate the assistance and technical support provided by CPT Gary Pickens of the U.S. Army Recruiting Command. He is commended for his interest in this research effort, his cooperation in problem resolution, and his loyal and continued support.

We are grateful for the cooperation of the officers, enlisted, and civilian personnel at the eight U.S. Army Reception Battalions and acknowledge that this survey research project could not have succeeded without their support. These personnel worked directly with us during the scheduling, survey booklet distribution, and administration of the New Recruit Survey, often extending their workdays in order to schedule the survey operations into their already hectic Summer "surge" processing of incoming new recruits.

Michael E. Benedict

THE 1986 ARI SURVEY OF U.S. ARMY RECRUITS:  
TABULAR DESCRIPTION OF NPS (ACTIVE) ARMY ACCESSIONS, VOLUME 2

EXECUTIVE SUMMARY

---

**Requirement:**

To obtain information concerning the enlistment motivations, attitudes, knowledge, and demographic characteristics of U.S. Army recruits at the time of initial entry into the service.

**Procedures:**

The 1986 ARI New Recruit Survey (NRS-86) is the seventh in a series of survey research projects administered directly by ARI. The 1986 survey retains much of the same item content as presented to respondents in all previous versions while incorporating new questions on U.S. Army recruits' awareness of and interest in the Reserve Officer's Training Corps College programs; awareness, interest, and participation in U.S. Army enlistment incentives programs; new television programming; and intentions for using U.S. Army training to obtain training and skills for future civilian job opportunities.

The NRS data collection was conducted at the eight (8) U.S. Army Reception Battalions during June, July, and August of 1986. A modified Latin-Square design was employed to randomize the selection of survey weeks across all eight Reception Battalions during the field data collection periods. ARI coordinated with Reception Battalion Operations personnel in scheduling the administration dates and times.

Four separate forms of the ARI New Recruit Survey were administered to U.S. Army recruits. Forms "A", "B", and "C" were administered to Active U.S. Army (RA) recruits, and Form "D" was administered to U.S. Army Reserve and National Guard recruits. Active Army recruits had an equal chance of receiving any one of the three RA forms. The survey was self-administered following specific instructions that were provided by on-site contractor personnel. Recruits were instructed to mark the responses that fit them best directly in the survey booklets.

Survey forms were registered as they were received at the contractor's site. Survey booklets were optically scanned and subjected to a post-edit programming process in which data accuracy was assured through manual verification of all write-in response items as well as investigations of light-mark reading errors for "Mark all that apply" questions. A technical manual, codebooks, tabulation volumes, and a report on the survey methodology, "lessons learned", and recommendations were produced.

## Results:

A total of 7,988 Active U.S. Army recruits were administered the 1986 New Recruit Survey. Based on U.S. Army military personnel records, 7,875 had no prior military service, and 92 had prior military experience (the status for the remaining 21 was not ascertainable). The sampling plan utilized for this survey imposes restrictions on the generalizability of the survey results to the overall 1986 fiscal year U.S. Army accessions population. However, the survey research process was successful in collecting and providing current information related to new U.S. Army recruits that can be compared to the previous (1983 - 1985) Summer New Recruit Surveys.

## Utilization:

The ARI New Recruit Surveys continue to provide information to U.S. Army policy makers and personnel planners about the quantity and quality of U.S. Army accessions. Specifically, information obtained from new recruits about their enlistment motivations, awareness and knowledge of enlistment incentives, and personal characteristics augments the available information on enlistment trends. Awareness of such trends is an integral part of the process of preparing to meet the U.S. Army's human resource requirements. Data and information from the 1986 New Recruit Survey has been and will continue to be used for these purposes, as well as providing information about recruits' media habits and preferences in order to maximize the effects of U.S. Army advertising.

THE 1986 ARI SURVEY OF U.S. ARMY RECRUITS:  
TABULAR DESCRIPTION OF NPS (ACTIVE) ARMY ACCESSIONS, VOLUME 2  
RP 87-13

INTRODUCTION

This publication together with a second volume, The 1986 ARI Survey of U.S. Army Recruits: Tabular Description of NPS (Active) Army Accessions, Volume 1 provide the first examination of the characteristics and attitudes of non-prior service recruits during their first week of active duty in the U.S. Army during the Summer of 1986. The measures of recruit characteristics and attitudes were obtained and recorded from the 1986 ARI Survey of Active Army Recruits (NRS-86) and combined with data from the Operational Reporting Master File (ORMF) personnel records database.

This document is one of eight volumes that provide documentation of the methodology and results obtained from the June, July, and August data collections that constituted the 1986 NRS. The separate technical manual and two codebooks documenting the survey methodology and database content are:

Benedict, M. E. (1987h). The 1986 ARI Survey of U.S. Army Recruits: Technical Manual. Alexandria, VA: U.S. Army Research Institute for the Behavioral and Social Sciences. (TR 735)

Benedict, M. E., Ellg, T. W., & Kopischke, D. W. (1987a). The 1986 ARI Survey of U.S. Army Recruits: Codebook for Active Army Survey Respondents. Alexandria, VA: U.S. Army Research Institute for the Behavioral and Social Sciences. (RP 87-08)

Benedict, M. E., Ellg, T. W., & Kopischke, D. W. (1987b). The 1986 ARI Survey of U.S. Army Recruits: Codebook for Army Reserve/National Guard Survey Respondents. Alexandria, VA: U.S. Army Research Institute for the Behavioral and Social Sciences. (RP 87-09)

The development of the survey content, the optical scannable survey instrument, survey administration procedures, and data quality assessments can be documented in a separate technical manual. Data file definitions, construction of recoded survey items, and the creation of variables from personnel records are covered in the survey codebooks. Survey data collected from active Army (RA) recruits (Survey forms A, B, and C) are documented in one codebook and survey data collected from U.S. Army Reserve (USAR) and Army National Guard (ARNG) recruits (Form D) are documented in the other.

Tabular survey results for the USAR and ARNG components are documented in the following publications:

Benedict, M. E., Elig, T. W., & LaBatte, J. A. (1987e). The 1986 ARI Survey of U.S. Army Recruits: Tabular Description of NPS Army Reserve Accessions, Volume 1. Alexandria, VA: U.S. Army Research Institute for the Behavioral and Social Sciences. (RP 87-12)

Benedict, M. E., Elig, T. W., & LaBatte, J. A. (1987f). The 1986 ARI Survey of U.S. Army Recruits: Tabular Description of NPS Army Reserve Accessions, Volume 2. Alexandria, VA: U.S. Army Research Institute for the Behavioral and Social Sciences. (RP 87-13)

Benedict, M. E., Elig, T. W., & LaBatte, J. A. (1987g). The 1986 ARI Survey of U.S. Army Recruits: Tabular Description of NPS National Guard Accessions. Alexandria, VA: U.S. Army Research Institute for the Behavioral and Social Sciences. (RP 87-14)

Volume 2 contains tables with crossing variables that are descriptive of antecedents to the recruits' enlistment (e.g., term of enlistment, recruiting brigade, age at entry into the Delayed Entry Program (DEP)/accessioning, etc.). Volume 1 of the RA and USAR tabular descriptions contains tables of New Recruit Survey items crossed by five selected demographic variables (e.g., sex, high school graduation year, race, etc.). The U.S. Army National Guard tabulations are contained in a single volume with crossing variables relevant to the component.

#### Organization of Tabulation Volume 2 -- Summer NRS-86, Active Army (RA) Component

This tabulation volume contains a brief overview of the 1986 NRS in addition to the tabular accounts of survey items crossed by the first five of ten crossing variables. This volume is divided into four major sections: (1) Introduction and NRS overview, (2) How to read and understand tabulation entries, (3) Tabulations of the survey responses of active Army (RA) recruits who entered active duty during the Summer of 1986, and (4) technical appendixes containing copies of the NRS-86 survey instruments.

The first section describes Volume 2 of the NRS-86 active (RA) tabular descriptions and its contribution to the eight volume set of reports that comprise the documentation for the Summer 1986 survey administration. The composition and layout of the tabular description volume is discussed and a synopsis of the New Recruit Survey project is provided. The second section guides the reader through the interpretation of cross-tabular data. This section explains what a reader should look for on tabulation pages, provides basic information concerning tabular data, discusses provisions for recoded survey variables, and provides advice in interpreting chi-square statistics. The third section contains an index to the tabulations contained in this volume and the tabular representations of the survey variables. The last section contains supplementary materials in the form of actual

Benedict, M. E., Elig, T. W., & LaBatte, J. A. (1987, April). The 1986 ARI Survey of U.S. Army Recruits: Tabular Description of NPS Army Reserve Accessions, Volume 1 (Research Product 87-10). Alexandria, VA: U.S. Army Research Institute for the Behavioral and Social Sciences.

Benedict, M. E., Elig, T. W., & LaBatte, J. A. (1987, April). The 1986 ARI Survey of U.S. Army Recruits: Tabular Description of NPS Army Reserve Accessions, Volume 2 (Research Product 87-11). Alexandria, VA: U.S. Army Research Institute for the Behavioral and Social Sciences.

Benedict, M. E., Elig, T. W., & LaBatte, J. A. (1987, April). The 1986 ARI Survey of U.S. Army Recruits: Tabular Description of NPS National Guard Accessions (Research Product 87-14). Alexandria, VA: U.S. Army Research Institute for the Behavioral and Social Sciences.

Volume 2 contains tables with crossing variables that are descriptive of antecedents to the recruits' enlistment (e.g., term of enlistment, recruiting brigade, age at entry into the Delayed Entry Program (DEP)/accessioning, etc.). Volume 1 of the RA and USAR tabular descriptions contains tables of New Recruit Survey items crossed by five selected demographic variables (e.g., sex, high school graduation year, race, etc.). The U.S. Army National Guard tabulations are contained in a single volume with crossing variables relevant to the component.

#### Organization of Tabulation Volume 2 -- Summer NRS-86, Active Army (RA) Component

This tabulation volume contains a brief overview of the 1986 NRS in addition to the tabular accounts of survey items crossed by the first five of ten crossing variables. This volume is divided into four major sections: (1) Introduction and NRS overview, (2) How to read and understand tabulation entries, (3) Tabulations of the survey responses of active Army (RA) recruits who entered active duty during the Summer of 1986, and (4) technical appendixes containing copies of the NRS-86 survey instruments.

The first section describes Volume 2 of the NRS-86 active (RA) tabular descriptions and its contribution to the eight volume set of reports that comprise the documentation for the Summer 1986 survey administration. The composition and layout of the tabular description volume is discussed and a synopsis of the New Recruit Survey project is provided. The second section guides the reader through the interpretation of cross-tabular data. This section explains what a reader should look for on tabulation pages, provides basic information concerning tabular data, discusses provisions for recoded survey variables, and provides advice in interpreting chi-square statistics. The third section contains an index to the tabulations contained in this volume and the tabular representations of the survey variables. The last section contains supplementary materials in the form of actual

# NEW RECRUIT SURVEY ARI DATA COLLECTIONS

- Appendix B: 1986/87 ARI Survey of Active Army Recruits (Form B)
- Appendix C: 1986/87 ARI Survey of Active Army Recruits (Form C)

#### NRS Project Background

The Army Research Institute (ARI) Enlistment Decision Surveys have become an important source of information to U.S. Army policy makers and planners. Originally developed by ARI in 1982 under commission by the Deputy Chief of Staff for Personnel, the 1986 New Recruit Survey is the seventh of a series of survey research projects investigating new U.S. Army recruits. Previous survey research projects conducted in this series include: (1) Summer, 1982; (2) Summer, 1983; (3) Winter, 1983; (4) Summer, 1984; (5) Winter, 1984; and (6) Summer, 1985 (See Figure 1).

This multi-year survey research endeavor has been conducted to measure the enlistment motivations, attitudes, knowledge, and personal characteristics of new recruits at the time of their initial entry into the U.S. Army. The ability to track changes in new recruit characteristics over time, as well as to provide an opportunity for the collection of new, policy-relevant information during each survey administration has provided an impetus for continuing the survey efforts.

Both the ARI New Recruit Surveys of 1982 and 1983 were conducted at the request of the U.S. Army Deputy Chief of Staff for Personnel. Sponsorship of the 1984, 1985, and 1986 surveys was assumed by the U.S. Army Recruiting Command, with the continuing interest of the Office of the Deputy Chief of Staff for Personnel. Although the sponsorship and specific question content has changed across time, the basic charter for these field research surveys has remained unchanged:

- Determine who is enlisting in the U.S. Army and why.
- Determine how to target recruiting resources to attract high quality recruits.
- Determine why recent recruits joined and their propensity to remain in the service.
- Determine which recruiting and advertising practices are proving the most effective and why.

In addition to addressing these specific objectives, the survey efforts have expanded the availability of research data by which U.S. Army enlistment and reenlistment decision processes can be modeled.

## 1986 New Recruit Survey Overview

The 1986 New Recruit Survey maintains the continuity of previous new recruit survey research efforts by collecting data from content areas common to all years. The 1986 survey retains much of the same item content as presented to respondents in all previous versions while incorporating new questions on: U.S. Army recruits' awareness of and interest in the Reserve Officer's Training Corps College programs; the New G.I. Bill program; awareness, interest, and participation in U.S. Army enlistment incentives programs; new television programming; and intentions for using U.S. Army training to obtain training and skills for future civilian job opportunities.

Dr. Edward L. Levine was contracted to administer the survey data collection at the eight (8) U.S. Army Reception Battalions during June, July, and August of 1986. Data Recognition Corporation was contracted to work with ARI in performing optically-scannable survey booklet design and instrumentation. They also were contracted for data capture, cleaning, database development, documentation, and tabular analyses.

A modified Latin-Square design was employed to randomize the selection of survey weeks across all eight Reception Battalions during the field data collection. ARI coordinated with Reception Battalion Operations personnel in scheduling the administration dates and times.

Four forms of the ARI New Recruit Survey were administered to U.S. Army recruits. Forms "A", "B", and "C" were administered to Regular U.S. Army (RA) recruits, and Form "D" was administered to U.S. Army Reserve and National Guard recruits. Regular U.S. Army recruits had an equal chance of receiving any one of the three RA forms. The survey was self-administered after specific instructions were provided by on-site contractor personnel. Recruit respondents were instructed to mark the responses that fit them best, directly in the survey booklets.

Survey forms were registered by Data Recognition Corporation personnel as they were received at the contractor's site. Survey booklets were optically scanned and verified through a post-edit programming process in which data accuracy was assured by manual verification of write-in response items and confirmation of optical mark reading errors for "Mark all that apply" questions.

A total of 14,362 U.S. Army recruits were administered the 1986 New Recruit Survey. Based on U.S. Army military personnel records, 13,117 had no prior military service, and 1,172 had prior military experience (the status for the remaining 73 was not ascertainable). The survey respondents were distributed across components as:

<u>Regular U.S. Army</u>	<u>U.S. Army Reserve</u>	<u>Army National Guard</u>
7,988	2,709	3,613

The sampling plan utilized for this survey, including only those recruits present at the Reception Battalions in June, July, and August, constrains the generalizability of the survey results. However, the survey research process was successful in collecting and providing current information related to new U.S. Army recruits.

## GUIDE TO USING THE 1986 NRS TABULAR DESCRIPTIONS

### Tabular Description Composition

This 1986 NRS tabular description volume provides an exploration of the survey results for Summer regular active Army (RA) respondents. Tables in this volume are organized into two major content areas: (1) Recruit Enlistment-Related Survey Items, and (2) Recruit Personal Characteristics Survey Items.

Many survey items that are documented in the 1986 codebooks are intentionally omitted from the tabular description volumes. Parental household characteristics (e.g., number of cars owned, property value estimates, and type of residence) have been excluded from the NRS-86 tabulations. Recruit demographic characteristics are used to tabulate survey responses but are not by themselves tabulated by other variables. Also excluded from tabulations are survey reported variables used to document the 1986 sample (e.g., Reception Battalion location, survey administration date, and survey form completed).

The most significant departure from previous years' tabular descriptions is the exclusion of survey items descriptive of respondents' exposure to specific broadcast programming and print media. However, those items that asked (a) when and how often respondents were exposed to radio and television programming and (b) how much time respondents spent reading printed materials have been included in this volume.

Survey items excluded from the tabular descriptions of NRS-86 active Army recruits include the following:

- Items relating to recruits' residence during teenage years (RESTAY, STATETAY, ZIP).
- Items relating to recruits' residence when the enlistment contract was signed (STATEENL, ZIPENL).
- Items concerning prior-military service (X667A-X667M).
- Experimental items (Y005 - Y007) relating to first and second most important reasons for enlistment.
- Skip pattern entry items (Y028, Y29A, X641).

- Month and year of school attendance (HSGMO, HSYEAR, X659A - X659B, X660A - X660B).
- Parental Household characteristics items (Y108 -- Y121).
- Type of Military Occupational Specialty (MOS) (T767).
- Radio Programming (X225 - X228, X671 - X675, X678 - X681 Y062).
- Television Programming (X240 - X244, X248 - X253, X755 - X757, Y063 - Y094).
- Cable Programming (X747 - X754).
- Magazine Reading Habits (X534 - X565, X694).

Some of the survey items excluded from the NRS-86 tabular descriptions would require extensive data transformations and analyses before useful facts could be provided. Other survey items are only valuable when combined supplemental data (e.g., parental household characteristics when combined with market research data). Such supplementation and analyses are not possible in these tabular descriptions.

Volume 2 of the regular active Army (RA) tabular descriptions presents tables of NRS-86 survey items with the following five crossing variables: (1) term of enlistment (Male High School Diploma Graduates and post-high school graduates, test category I-III A only), (2) eligibility for the Army College Fund and/or cash enlistment bonus incentives (High School Diploma Graduates and post-high school graduates only, test category I-III A only), (3) recruiting brigade, (4) rural/urban nature of pre-enlistment residence, and (5) age at time of contracting. See The 1986 ARI Survey of U.S. Army Recruits: Codebook for Active Army Survey Respondents (ARI Research Product 87-06, for the details of crossing variable construction for the RA component.

Volume 1 of the regular active Army (RA) tabular descriptions presents tables of NRS-86 survey items with the following five crossing variables: (1) survey respondent gender, (2) highest educational attainment, (3) AFQT category (Male High School Diploma Graduates and post-high school graduates only), (4) year of high school graduation (High School Diploma Graduates and post-high school graduates only), and (5) ethnic/racial composition.

Volume 1 of the U.S. Army Reserve (USAR) tabular descriptions presents tables of NRS-86 survey items with the following five crossing variables: (1) survey respondent gender, (2) highest educational attainment, (3) ethnic/racial composition, (4) marital status, and (5) AFQT category.

Volume 2 of the U.S. Army Reserve (USAR) tabular descriptions presents tables of NRS-86 survey items with the following five crossing variables: (1) Split Training/Simultaneous Membership Program

participation, (2) Reserve Incentive Program eligibility (High School Diploma Graduates and post-high school graduates only, test category I-111B only), (3) recruiting brigade, (4) rural/urban nature of pre-enlistment residence, and (5) age at time of accessioning.

The Army National Guard (ARNG) tabular descriptions present tables of NRS-86 survey items with the following five crossing variables: (1) survey respondent gender, (2) highest educational attainment, (3) self-reported ethnic/racial composition, (4) rural/urban nature of pre-enlistment residence, and (5) age at time of accessioning.

### Contents of a Tabulation Page

Tabulation pages for each survey item included in this volume contain the following descriptive information: (1) variable name, (2) variable label contained in the Statistical Analysis System (SAS) database file, (3) statement of the survey question, (4) response category values and labels, (4) item location in Forms A, B, C, and D of the NRS-86 survey questionnaire (e.g., Form and question number for variable T001 = A007, B007, C007, D007; Forms A, B, C, and D, Question #7), and (5) number of non-prior service survey respondents who had the opportunity to respond to the survey item.

In addition to these information sources, each tabulation page contains information to assist the reader in interpreting the tables for each item. This information includes: (1) the title of each table (survey variable number by crossing variable used for the table, (2) labels for the categories of each crossing variable, (3) the total number of respondents within each category of the crossing variable, (4) the total number of respondents to the particular question of interest, (5) value categories for the survey item, (6) the percentage of responses within each category of the crossing variable, and (7) Pearson's chi-square statistic results with its associated degrees of freedom and probability level. Since the NRS-86 contains a large proportion of questions that required the respondents to "Mark all that apply", such serial list questions have been configured as a single table for each in presentation. Such tables present chi-square values, degrees of freedom and probability levels for each line entry. Examples of both types of survey item presentation are provided in the next section of this volume.

### Tabular Presentation Conventions

The 1986 New Recruit Survey Tabular Descriptions contain responses from 7,875 non-prior service (NPS) recruits who participated in the survey during the months of June, July, and August in 1986. The total number of responses may change from table to table as well as in the total number of respondents who were exposed to individual questions on the survey. There are four reasons for these differences in response.

The first reason is that some tables are limited to specific groups of individuals. For example, respondents who did not receive a high school diploma or attend a post-secondary school are excluded from those tables crossed by the year individuals received their high school diploma (XHSYEAR).

The second reason is item non-response. The NRS-86 consisted of 231 questions administered in a one-hour time frame. Thus, questions toward the end of the survey booklet may exhibit decreases in the number of respondents who had the opportunity to respond to the questions. Recruits taking longer to complete the survey due to reading speed or response speed may have run out of time before completing the survey. Other recruits may have become frustrated with the length of the survey and entirely stopped responding. Survey respondents who did not answer questions or who made two or more responses when asked to "Mark only one" are not included in the tabulated question totals. Interpretation of items positioned later in the survey should be made more cautiously than of items positioned earlier in the survey.

The third reason for differences in respondent totals is that individual survey items were not included in all forms of the survey booklets. Thus, for certain survey items, approximately two-thirds of the respondents will be missing, as the question did not appear in two of the three survey forms. These items can be readily identified by referring to the total number of NPS surveyed identifier for each tabulated item.

The fourth reason involves the presentation of recoded survey items in the tabular descriptions. Survey items were recoded either for clarity of presentation in the tabular descriptions or to ensure accuracy of eligibility of incentive program participation. In the first situation, respondents who were asked how many weeks they spent looking for a full-time job in the last year could select from 53 possible responses (0 to 52 weeks). This type of item was recoded into response categories (e.g., 0 weeks, 1-4 weeks, etc.). In the second situation, respondents answering questions about Army recruiting incentive options (e.g., Army College Fund, 2-year enlistment, or cash enlistment bonus) whose eligibility for or receipt of such options could not be verified in Army personnel records were not included in the tabulations for such questions. The recoded versions of such incentive survey items include only those respondents who actually received the specific incentive or who were eligible to receive the option. Figure 2 provides an example of a recoded survey item that requested a "Mark only one" response.

Survey items in this volume are presented in five two-way cross-tabulation tables that correspond to the five crossing variables of interest. The tables for each survey item are typically presented on two facing pages. The page on the left contains the descriptive information about the survey item as well as the first two tables. The page on the right contains the remaining three tables. Survey items containing multiple response categories that preclude this standard method of presentation are displayed with one table per page.

Figure 2. Example of a tabulation page for a recoded survey item

## EXPLANATION OF FIGURE 2 CONTENTS OF A TABULATION PAGE FOR A RECODED SURVEY ITEM

- 1 Page number.
- 2 Variable name for tabled survey item.
- 3 Variable label.
- 4 Notation indicating that the survey item has been altered from its original format. Changes are due to regrouping of response alternatives.
- 5 Statement of survey item as it appears in the questionnaire.
- 6 Actual/recoded values of tabled survey item.
- 7 Value labels for tabled survey item.
- 8 Question location on each form of the 1986 NRS. The letter of the survey form appears first followed by the question numbers. When the question was not included on a specific survey form, the space for that survey form (A-D) is left blank.
- 9 Total number of completed surveys received from non-prior service recruits in a specific Army component. This number is an unweighted count based on the survey sample. In this example, "Total NPS Surveyed is 7,875" means that 7,875 non-prior service RA respondents completed surveys.
- 10 Table title (survey item by crossing variable label).
- 11 Value labels for crossing variable. In this example, the labels describe the categories of gender which can only be male and female. Each of the crossing variable have unique value labels which will remain the same across survey item/table presentation.
- 12 Frequency counts of responses to survey item broken down by category of the crossing variable. These may be referred to as "marginal N's" since they provide an overall count or number of responses within each category of the crossing variable.
- 13 Total number of valid responses. This is a marginal N of total responses to this survey item across crossing variable categories. In contrast to item 9 (N of NPS completed surveys), this N will necessarily vary across tables due to missing values on particular survey items; however, this number will always be less than or equal to the number reported in item 9.
- 14 Survey item values. Only item values are presented in the actual tables to preserve clarity; however, these values are described (labeled) at the top of the tabulation page (see item 6).
- 15 Sample percentages broken down within crossing variable categories.
- 16 Sample percentages of responses across crossing variable categories. These percentages are presented for each survey item category.
- 17 Total column percents. These column percentages will equal 100% in all tables, since the percentages of sample responses within each crossing category must account for the total responses within that crossing category.
- 18 Value of the chi-square statistic.
- 19 Degrees of freedom (D.F.) associated with the chi-square statistic.
- 20 Probability based on the chi-square distribution (see the final section in this chapter for a discussion on interpretation of the chi-square statistic).

"Mark all that apply" questions present a general question such as "Did you receive military recruiting literature in the mail without asking for it?", and then ask the respondent to evaluate a number of sources from which such literature might have been received. By selecting one or more military services, the respondent answers multiple True - False questions within the same question (e.g., True - False: Received Army (regular active duty) recruiting literature; True - False: Received Army Reserve recruiting literature; etc.). Each response category in such survey items is used to construct a dichotomous variable that indicates whether or not the respondent marked the item. Each serial response survey question has been combined into a single table for ease in interpretation and presentation. Figure 3 contains an example of such a serial response survey item. Each row in the table contains a different variable that corresponds to one of the possible response categories in the original survey question. Thus the example in Figure 3 condenses 12 individual tables into one summary table.

Each row in the summary table represents a table that includes both the percentage of individuals who checked the responses category and the percentage of individuals who did not check the particular response category. For example, rows A and B in the example summary table may be interpreted as follows:

- 60.7% of all male respondents to item T051 reported having received military recruiting literature in the mail without asking for it. 39.3% of all male respondents did not report having received such literature. Similarly, 37.2% of all female respondents reported having received un-requested military recruiting literature in the mail, while 62.8% did not report having received such literature. 46.7% of all male respondents reported receiving regular active Army recruiting literature in the mail without asking for it, while 52.3% of all male respondents did not report receiving such regular active Army recruiting literature. The population percentages of all responses to item T051 categorized 58.9% of new recruits as having received military recruiting literature in the mail without asking for it and 41.1% as not receiving such literature.
- The chi-square statistic associated with Row A in the table is testing the relationship between gender and receiving military recruiting literature in the mail without requesting it. The chi-square value at 119.986, with 1 degree of freedom, yields the probability of 0.0001. This is considered to be a highly significant statistical difference between groups.

# T051 -- RECEIVED UNREQUESTED INFORMATION

## Interpreting Pearson's Chi-Square Statistic

Pearson's chi-square statistic is reported for each of the tables in this volume. A significant chi-square indicates that the response pattern cannot be explained just by knowing how many respondents are in each category and how many respondents marked each response. A nonsignificant chi-square indicates that the categories of respondents probably do not differ on the question. Because of the very large number of tables being presented, statistical significance for these tables should be set at the .001 probability level. That is, chi-squares with probability levels equal to or less than .001 should be taken as strongly indicating that the question responses do differ between categories of recruits. At this probability level, there is only 1 chance in a thousand that the chi-square would be significant by chance alone. A conservative rule of thumb when judging the significance of table is that if the probability level is no larger than .01 and preferably .001 or smaller, and the responses fall into some meaningful pattern, then it is likely that there is a real difference in the way the categories of recruits responded to the question.

## COMPARISON OF NRS-86 TO PREVIOUS SURVEY RESULTS

### Survey Demographics

Table 1 compares the 1986 New Recruit Survey respondents to those in 1983 through 1985 on several demographic variables thought to influence answers to the survey items: Armed Forces Qualification Test category (AFQT), recruiting brigade, gender, education, term of enlistment, and age at contracting. There are significant differences among the four samples. More high school diploma graduates entered onto active duty and participated in the NRS this year compared to all previous administrations. More 2-year enlistees participated in the 1986 survey than in previous years. More survey respondents from the southwest and fewer from the midwest and west participated in the 1986 survey. One of the most important differences is that fewer female respondents participated in the 1986 survey due to overcrowding of female barracks and subsequent expedited processing at reception battalions that resulted in many female respondents being unavailable for the survey administration.

### Crossing Variable Comparability

The variables used as banners for the 1986 tabular description volumes were created from official military personnel records (USAREC's Operational Reporting Master File - ORMF) and self-reported survey items. The comparability of these items to previous NRS administrations is not exact because of the method by which the crossing variables were developed. For example, the test category

Table 1

• AFQT Norms: 1983 - WWII; 1984 - 6 - Youth Norms Revised Tables

SOURCE: MEPRS Data for 1983, ORMF Data for 1984 - 1986, and ARI Surveys of New Recruits

crossing variable created for 1986 survey respondents was calculated directly from the raw test scores recorded in each recruit's personnel file. Since AFQT category assignment depends on both the test version and date of administration, the crossing variable for 1986 has been calculated to be essentially the same as used in the 1984 and 1985 NRS tabulation volumes. However, the 1986 AFQT category crossing variable is not comparable to that used in the 1983 tabulation volumes.

### Survey Item Comparability

Because of changes in the way survey items have been asked over the survey administration years, it is not possible to directly compare many items in the 1986 survey with similar items in previous surveys. For example, the ordering of questions is important and may change the meaning of a question. Previous surveys did not utilize the optically scannable survey booklet and answers were either written directly on the survey pages or transcribed to a separate answer sheet. These formats did not allow for complex patterns to skip sections of the survey that did not apply to the respondents' background or enlistment history. The 1986 survey contains many built in skip patterns that route the respondents through the survey questions. These complex skip patterns may affect the way questions were perceived and the questions may no longer be comparable to previous versions.

While many comparisons of levels of responding among the 1983 through 1986 surveys may be invalid, comparisons of effects can be made if cautiously interpreted for most items that were used in two or more years' surveys. For items that were changed, relationships can be compared, but not response magnitudes. This caution should be kept in mind when comparing the NRS series of results. Readers interested in multi-year comparisons are encouraged to refer to the codebooks and user's manuals for each survey administration to ensure comparability of survey items, response categories, and crossing variables.

### Tabular Description Index

The tabular description index on the following pages provides a table of contents for the tabulations. The index presents three sources of information about each survey item included in this volume. Presented in the order of appearance of items in this volume, the index includes each item's: (1) variable name, (2) SAS variable label, and (3) page number location.

T098      -- MOST IMPORTANT REASON FOR ENLISTING

BELOW ARE SOME REASONS THAT PEOPLE JOIN THE MILITARY. THE NEXT TWO QUESTIONS CONTAIN VERY SIMILAR SETS OF REASONS. THEY DIFFER ONLY IN A FEW OF THE RESPONSES. PLEASE BE CAREFUL IN ANSWERING; TRY TO ANSWER EACH QUESTION WITHOUT COMPARING IT TO THE OTHER ONE.

WHICH OF THESE REASONS IS YOUR MOST IMPORTANT REASON FOR ENLISTING? (MARK ONLY ONE)

- 1    I WAS UNEMPLOYED.
- 2    TO BE AWAY FROM HOME ON MY OWN
- 3    CHANCE TO BETTER MYSELF
- 4    TO GET AWAY FROM A PERSONAL PROBLEM
- 5    TO SERVE MY COUNTRY
- 6    EARN MORE MONEY
- 7    FAMILY TRADITION TO SERVE
- 8    TO PROVE THAT I CAN MAKE IT
- 9    TO GET TRAINED IN A SKILL
- 10   MONEY FOR COLLEGE EDUCATION

T205 -- MAIN REASON ENLISTED INSTEAD OF SCHOOL

WHAT IS THE MAIN REASON YOU DECIDED TO ENLIST IN THE ARMY INSTEAD OF GOING TO SCHOOL?

- 1 DOES NOT APPLY - I HAVE NO INTEREST IN FURTHER EDUCATION.
- 2 I COULDN'T GET INTO THE SCHOOL(S) I WANTED.
- 3 I COULD GET THE SAME OR BETTER TRAINING IN THE MILITARY.
- 4 I COULDN'T AFFORD TUITION.
- 5 I CAN'T SUPPORT MYSELF (AND MY DEPENDENTS) AND GO TO SCHOOL AT THE SAME TIME.
- 6 OTHER

X195 -- REGULAR HIGH SCHOOL DIPLOMA GRADUATE

ARE YOU A REGULAR HIGH SCHOOL DIPLOMA GRADUATE (NOT A GED) WITH A DIPLOMA FROM A STATE-RECOGNIZED (ACCREDITED) HIGH SCHOOL?

IF NO, WHY DID YOU NOT GET A DIPLOMA OR WHY DID YOU LEAVE SCHOOL EARLY?

- A YES
- B I COMPLETED 12 YEARS BUT FLUNKED THE STATE TEST TO GET A DIPLOMA.
- C I COMPLETED HIGH SCHOOL IN A SCHOOL NOT RECOGNIZED (ACCREDITED) BY THE STATE.
- D MY FAMILY NEEDED MONEY OR NEEDED ME AT HOME.
- E I WAS EXPELLED OR SUSPENDED.
- F I FOUND A JOB I LIKED OR I WANTED TO WORK FULL TIME.
- G I WAS BORED, WASN'T LEARNING ANYTHING USEFUL.
- H I GOT MARRIED OR HAD A CHILD.
- I I DIDN'T GET ALONG WITH THE OTHER STUDENTS.
- J THE RULES WERE TOO STRICT OR I DIDN'T GET ALONG WITH THE TEACHERS, COUNSELORS, OR PRINCIPAL.
